## JANESVILLE LINES UP FOR SANITATION

Drinking Fountains All Over the City  
Speak Well for the Progress of  
City--Water for Thirsty Crowds.

Janesville has taken her place along with those other cities whose object is good hygiene and sanitary conditions for its citizens. Heretofore all Janesville's public drinking fountains have

been of the old fashioned type, with the old, unsanitary tin cups chained to them. This type of fountain, it has been recognized for a long time, is an excellent spreader of disease, and in all large cities has been under the ban of the law. In its place have been substituted various sanitary types, most of them consisting of a tube out of which water bubbles, from which one drinks.

Impelled by the desire for public safety and convenience, the city and various private individuals have lately installed these sanitary fountains for public use. The old fountain in front of the Court House Park and the fountain on the Corn Exchange have been changed to the sanitary type, by connecting the supply pipes up in the form of a mouthpiece. The old pipe fountain on the Corn Exchange has also been remodeled in that way. The Janesville Water Co. has installed a most artistic cement fountain in front of its office on North Main street, and P. E. Green has placed a four bubbler fountain in front of his shop on South Main street.

Such a movement as this cannot receive too hearty approval from the general public, for it not only means much greater safety for the citizens who use the fountains, but it also is a great improvement in the looks of the city, for the old, battered tin cups that were used formerly were anything but all but sightly.

WISCONSIN LAW-MAKERS WILL  
FINALLY ADJOURN THIS  
WEEK AFTER COMPLET-  
ING LARGE AMOUNT

## ALL PARTY PLEDGES

Have Been Redeemed. Is Claim of  
Party Leaders--Income Tax Bill,  
Initiative and Referendum, Cor-  
rupt Practice Act, Work-  
men's Compensation Act  
Among Bills Passed.

[SPECIAL TO THE GAZETTE.]  
Madison Wis., July 4.—With a record of favorable action on the income tax the initiative and referendum, a comprehensive corrupt practices act, the right of voters to express their second choice of candidates for nominations at primaries and for majority nominations, workmen's compensation and home rule for cities, the Wisconsin legislature this week will finally adjourn.

Pledges Redeemed.  
Leaders of the republican majority assert that every platform pledge made to the people during the last state campaign has been redeemed. The legislature is held to be the most progressive ever assembled in Wisconsin, known for its progressive political attitude throughout the United States.

Stephenson Investigation.  
One of the last important legislative acts was the passing of a resolution calling upon the United States senate to investigate the charges of corruption connected with the election of United States Senator Isaac Stephenson. Other so-called progressive measures enacted include laws providing for the state control and taxation of water powers, conservation of natural resources, conservation of public health, improvement in the state's educational system and the amelioration of the conditions of the working classes.

School Appropriations.  
Increased appropriations were made for the state university and state normal schools. The total appropriation for the university for the next two years aggregate \$1,700,000 and for the normal schools \$1,300,000. Increased state aid for the common schools also was provided.

Increases Shown.  
The total appropriations made by the legislature for the coming two years, together with the existing appropriations and state taxes, are estimated a \$20,000,000, about one-half of which is charged to existing appropriations. The increase in appropriations made by the legislature just ending are about \$700,000 a year. This does not include the increase in special state taxes for educational and other purposes.

Learning.  
Learning maketh young men temperate, in the comfort of old age, standeth for wealth with poverty, and serving as an ornament to riches.—Cicero.

Self-Massage.  
To enable a person to massage himself without assistance there has been patented an apparatus to be fastened to a wall, adjustable to any height, in which a wheel with leather covered balls on the ends of the spokes is rotated by cranks and suitable gears.

## "A VOICE," THE SENSATIONAL WITNESS IN OHIO BRIBERY TRIAL

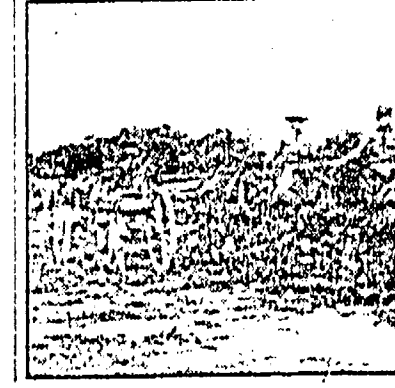

R. J. Diegel, on trial charged by the state of accepting a bribe from Detective Harrison.

Columbus, Ohio.—The principal figure in the Diegel bribery trial testimony will not be a figure at all, but a voice. The voice is so far unidentified, but for that reason will be accepted by the court as evidence and the state expects to prove later that it is the voice of Mr. Diegel. This however is to be subject to prove.

In all of the court records the evidence given through the phonograph will be not in the name of John Diegel in the name of Mr. Diegel, but simply "a voice". It is one of the most unique incidents in the history of Ohio jurisprudence. It is alleged by the state that the record was secured during a conversation between a detective and Mr. Diegel, when the former offered the state legislator a bribe.

## SIXTY-TWO STUDENTS AT TRAINING SCHOOL

SUMMER SESSION OF ROCK  
COUNTY TRAINING SCHOOL  
BEGAN IN HIGH SCHOOL.

## HELD FIRST SESSION

Auspicious Opening of New Rock  
County Institution Monday Morn-  
ing--Plans For Work.

Sixty-two students, mostly high school graduates, who expect to take examinations for teachers' certificates over enrolled at the opening of the training school Monday morning. This is expected to be one of the most interesting sessions ever held here and with the additional number that will enroll on Wednesday and Thursday will be one of the largest. In the model school which will be conducted by Miss Lorena Rickerman in the Lincoln school thirty-five children from the local schools were awaiting instruction and at the same time showed their willingness to submit as subjects on which the prospective teachers are to experiment in trying to learn the art of teaching.

The teaching staff for the training school is composed of the following in addition to Superintendent Antkowiak: H. C. Juel, Janesville; T. J. Lovitt, Evansville; E. L. Roethe, Mrs. Elin Jacobson, Miss Lorena Rickerman and Mrs. G. C. Hyde. An interesting schedule of studies is outlined for this six-weeks session, comprising all the common school branches and it is intended primarily to give young teachers a more thorough insight into the theory and practice of teaching. The model school will be used in a practical way to show how the different branches can be taught best to the ordinary pupils.

On account of the military celebration now in progress no regular work was taken up at the preliminary session held Monday morning.

Only the routine work of registering and having lessons assigned was carried on and no class will be held until Thursday. Of the total number enrolled for the session only twenty have had any experience in teaching and this seems to indicate that this profession has not lost its attraction for a large number of the high school graduates in spite of the fact that those who follow the profession are almost unanimous in declaring that its advantages are few and its trials many. Perhaps the prospects for an old age pension is in part responsible for the attraction.

## How It Is Done.

THE man from Winnipeg had been telling us for half an hour about the winter weather in that section, and when he had paused for wind the man from Rhode Island drew a long breath and said:

"Sir, I don't dispute you. I never dispute any gentleman. But, sir, if I have followed you correctly, you sometimes have as much as 20 feet of snow at once in your town?"

"I have seen as much as 20 feet and two inches," was the reply. "I left the two inches as a safety margin."

"And when such a fall of snow comes what do you do, sir?"

"Nothing—nothing 'tall."

"But with 20 feet of snow on the streets business must be interrupted?"

"Oh, yes."

"And it must be impossible for pedestrians to move about?"

"That is true."

"Then, sir—then will you kindly answer me what you do?"

"I will, sir. We simply wait a few minutes."

"I—I don't exactly understand."

"Why, when the snow gets 20 feet deep a chinook wind sets in, accompanied by a warm rain, and in half an hour the snow is all gone. Just a slight delay, sir—slight delay."

"But that melting snow must make a tremendous quantity of water?"

"It does, sir."

"And what do you do with it?"

"I use it to make our ice cream and soda water for the next summer. I fear, sir, that you are not very well posted as to the resources of your neighboring province."
